Strategic Decision 17

Strategic Partner

Pishgaman Kargosha Sanat Group (PKS Group) entered the country's industry in 2015, drawing on the technical knowledge, distinguished track record and intellectual capital of its shareholders. From day one, our core mission has been to play an effective role in achieving the major goals of industrial projects and to become a reliable link in the chain of supply, technical, engineering and specialized services.

A Strong Presence in Strategic Industries

Today, after more than a decade of continuous activity, PKS Group is a trusted name among the country's leading clients and contractors. Focusing on the following key areas, we deliver comprehensive, integrated solutions to our business partners:

1. **Goods Supply**

   An agile, reliable supply chain for key equipment and raw materials, to the highest quality standards.

2. **Technical & Engineering Services**

   Tailored solutions, reverse engineering, and equipment repair and calibration, based on customer needs and the operational sensitivities of each industry.

3. **Technical Support**

   Sustained technical support well beyond the moment of delivery, ensuring continuity of operation.

Our expertise spans the country's core infrastructure industries: oil & gas, petrochemicals, utilities, power generation, steel and mining, water treatment, food and pharmaceuticals, and related industries. The result of this focus is the lasting satisfaction of our clients.

Global Network, Modern Solutions

What makes PKS Group a distinctive partner is its smart, extensive commercial network for the fast, economical and high-quality transfer of goods and technology into the country. By identifying reputable, experienced partners in various countries and working with trusted brands, we strive to achieve agile processes and customer satisfaction. This network is the foundation for delivering on our promises:

PKS Group:
Trust today, growth tomorrow.

Our promise: trust, competitiveness, lasting partnership

Our philosophy is simple yet profound: precisely identifying reputable global brands, offering the best solutions, creating healthy competition to reduce costs and raise quality, and ultimately nurturing a relationship that goes beyond a "contract" to become a "strategic partnership".

At PKS Group we are not merely a supplier, but a trusted advisor and long-term partner on the path to your projects' success. Our vision is to secure our position as the first choice of discerning clients for industrial projects with the highest technical, quality and schedule standards.

Quality Policy

Committed to Excellence, Steadfast in Trust

At PKS Group, we believe quality is not a single stage of the process but the essence of everything we do and the common language we share with our clients and stakeholders. Fostering a culture of quality is a strategic asset for the organization and, together with organizational creativity and sustainable productivity, paves the way for our presence in new domestic and international markets.

To this end, the company is determined to systematically meet the quality requirements of its projects and services, and to strengthen its competitiveness in every field of activity, by establishing, monitoring and continually improving quality management systems based on the latest editions of international standards, including ISO 9001 (quality management systems) and ISO/TS 29001 (sector-specific quality management requirements for the oil, gas and petrochemical industries).

PKS Group: quality, the foundation of lasting trust.

Our Fundamental Commitments to Quality

- **Continuous Improvement and Excellence in Services and Processes**
  We are committed to continually improving the quality of our products, services and organizational processes so that, in full compliance with technical requirements, standards and client needs, their lasting satisfaction is secured through the timely and proper delivery of projects and contracts.

- **Effective Engagement with Clients and Business Partners**
  We see continuous, transparent and constructive communication with clients and business partners as the basis for our growth, and commit to understanding their expectations precisely and responding intelligently.

- **Earning Credibility Through Trust**
  We regard client trust not merely as a business goal but as a strategic indicator of continuity and of a lasting presence in a competitive market, and we spare no effort to preserve and strengthen it.

- **Institutional Development Built on Human Capital**
  We believe quality can only advance through the growth and empowerment of our people. We therefore emphasize the committed, creative and results-driven participation of all employees as the most valuable factor in improving quality management, and provide an environment that supports learning, innovation and accountability.

- **Market Development and a Stronger Corporate Brand**
  We regard strict adherence to quality requirements and customer focus as the engine for developing our target markets and elevating the PKS Group brand as a symbol of commitment, expertise and reliability.

Closing Statement

This policy is the charter for our journey toward quality. Senior management guarantees its implementation, monitoring and continual updating, and holds itself accountable for its fulfilment. We expect all employees, suppliers and business partners to make these principles their guide and to join us in building a future founded on quality and innovation.

Procurement and Goods Supply Services

A Systematic Approach to Your Project's Success

We understand that success in industrial projects comes from precise synergy between planning, engineering and procurement. The range of equipment and raw materials required in the oil, gas, petrochemical, utility, power, steel and mining, water treatment, food, pharmaceutical and other industries is so broad and specialized that only a smart, agile and knowledgeable supply chain can meet its diverse needs. The supply of equipment and raw materials for each project must therefore be designed and executed in full alignment with that project's predefined phases, execution schedule and technical requirements.

In EPC (engineering, procurement and construction) projects, obtaining technically acceptable proposals that fully comply with the client's requirements and specifications is the cornerstone of successful procurement. Relying on three pillars — the expertise, experience and technical knowledge of its people — in identifying reputable global manufacturers, evaluating proposals techno-commercially and managing the supply chain in an integrated way, PKS Group has demonstrated an exceptional capability to meet this strategic need.

It is this expertise that has earned the lasting trust of our clients and turned their satisfaction into long-term, effective cooperation with our company.

Equipment & Goods Supply Across Industries

PKS Group is ready to supply a wide range of equipment from reputable, well-known brands in the following areas, according to customer requests:

- All types of industrial valves (manual, motorized, control, pneumatic, hydraulic and safety valves) in various pressure classes and sizes
- Instrumentation, control systems and industrial automation equipment
- Electrical equipment, transformers, and low- and medium-voltage switchgear
- Rotating equipment (pumps, compressors, turbines, fans, etc.)
- Safety, fire-fighting and industrial ventilation systems
- Laboratory equipment for the chemical industries
- Equipment for water treatment packages (RO & SWRO)
- Spare parts for various equipment, according to the client's specified brand
- Other specialized, project-specific items on client request

The supply of piping and process-line raw materials is the backbone of every industrial project.

In this field, drawing on a dual domestic and international supply network, we can supply a wide range of raw materials to the highest quality standards and in the shortest possible time, from reputable brands, with documentation and quality certificates to the international EN 10204 standard.

General Specifications of Available Materials

Material type	Reference standards	Common grades
Seamless and welded carbon steel pipes	ASTM A106, ASTM A53, API 5L	B, C, X42, X52, X60, X70
Alloy and stainless steel pipes	ASTM A335, ASTM A312	P11, P22, P91, TP304L, TP316L, TP321
Duplex and super duplex pipes	ASTM A790	S31803, S32750
Carbon and alloy steel plates	ASTM A516, ASTM A283, ASTM A240	Gr.60, Gr.70, 304L, 316L
Piping fittings	ASTM A234, ASTM A403	WPB, WPC, WP11, WP22, WP304L, WP316L
Flanges and gaskets	ASTM A105, ASTM A182	A105N, F11, F22, F304L, F316L
Structural steel sections	ASTM A36, ASTM A572	A36, Gr.50
Industrial bolts and nuts	ASTM A193, ASTM A194	B7, B7M, B8, B8M, 2H, 8
Non-metallic and thermoplastic materials	PVC, PVDF, TFE	

Our Commitments in Material Supply

- Exclusive cooperation with reputable international and domestic manufacturers
- Pre–order visits to manufacturers' plants to assess technical and quality capabilities
- Rigorous inspection and quality control to international standards and the approved ITP
- Flexibility to source domestically to meet urgent project needs
- Valid material test certificates (MTC) to EN 10204 and project–specific requirements

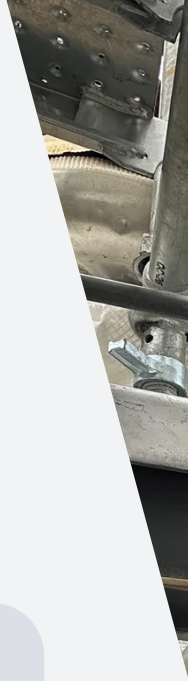

Technical & Engineering Services

Backed by the technical knowledge and experience of the PKS Group engineering team, calibration, troubleshooting, repair and technical consulting services can be provided on project sites.

- Design and reverse engineering of equipment and machinery; non–destructive testing
- Troubleshooting, repair and calibration of equipment on site at client and customer facilities
- Technical consulting, non–destructive testing services and goods inspection
- After–sales service and technical support, from installation through in–service maintenance

The Core Pillars of Our Supply Chain

1

Smart global sourcing: identifying and prioritizing reputable manufacturers by precise fit with project needs — beyond brand, based on proven capability.

2

Rigorous techno-commercial evaluation: in-depth analysis of technical proposals to ensure full compliance with the required specifications and the best price-to-value ratio, while safeguarding quality.

3

Integrated order-to-delivery management: planning, control and real-time tracking of orders from sourcing and manufacturing through shipping, customs clearance, final delivery and installation on site.

Our Fundamental Commitments to Quality

- **Continuous Improvement**

  Ongoing upgrades to processes, services and products to fully meet technical needs and current standards.

- **Transparency and Accountability**

  Constructive, ongoing dialogue with clients to understand expectations precisely and offer smart solutions.

- **Guaranteed Authenticity and Compliance**

  All supplied equipment comes with valid mill certificates (MTC, Inspection Certificate) and, at the client's request, under the supervision of third-party inspectors (Third-Party Inspection).

- **Committed Human Capital**

  We believe quality is the product of the participation, creativity and accountability of every one of our colleagues, and we foster an environment that supports learning and innovation.

This policy is our charter. Senior management guarantees its implementation and continual updating, and holds itself accountable for its fulfilment.

Start Your Partnership with a Strategic Decision.

Now that you are familiar with our approach, expertise and capabilities, we invite you to take a step toward a lasting, trust-based partnership. At PKS Group we are ready, as your technical and commercial partner and trusted advisor, to turn the challenges of supplying equipment, raw materials and technical-engineering services for your projects into an opportunity to raise productivity and reduce risk.

Our vision is to become your first choice for industrial projects with the highest technical, quality and schedule standards.

To receive specialist advice, request a quotation and begin a win-win partnership, contact us. We look forward to hearing from you.
